

Rivers and Streams

Shoreline Erosion and Sediment Deposition

SHORELINE EROSION MITIGATION

Proper Stormwater Management

Collect. Contain. Infiltrate.

Manage stormwater where it falls to reduce runoff erosion

Armor and Stability

Plant power and weakened waves

Use native vegetation to stabilize soil and riprap to act as armor for reducing wave impact

Reduced Activity

Less disturbance = Less erosion

Respect Our Waters 
Shoreline Strategies

Avoid walking in sensitive areas and doing construction along the shore to ensure soil stability
